

HANGING WIRES AND HOOKS

1

SIMPLE-SAFE-STRONG

Artiteq developed the Twister glider system for all its hanging rails. Twister offers the most logical and user-friendly way to hook the hanging wire into the rail: insert, twist, click and you're done. Since the Twister may be clicked anywhere on the rail, you can hang a picture anywhere you like on the wall. You have the option of using Twister in perlon, steel wire or rods for all the Artiteq hanging systems.

The perlon and steel hanging wires with the Twister mechanism are available in 1 or 2 mm thicknesses, and in lengths ranging from 100 to 500 cm.

TWISTER™

Twister is a European Registered Community Design.

2

TWISTER™ CLIQ2FIX_{perlon}

EXTRA EASE-OF-USE

Thanks to the development of the Twister Cliq2Fix perlon system, perlon cord now has an additional functionality when it comes to hanging pictures. The hanging wire equipped with the Twister Cliq2Fix system may be inserted in the rail, eliminating the risk of the perlon cord popping loose from the rail as a result of its recoiling effect. This makes it extra safe, and easy to slide into the rail. In other words, extra ease-of-use.

MAX.
20 KG

3

SOLID SLIDER

SLIDE INTO SIDE

Artiteq developed the Solid Slider system which attaches the hanging wire with glider via the side of the rail. This system is available for 2 mm perlon and 2 mm steel wire. The hanging wire may be freely slid into the hanging rail, yet may not be removed from the rail as easily. Hanging wires with the Solid Slider

mechanism are available in lengths of 100, 150, 200, 250, 300 en 500 cm. A slanted stop system is available for slanted walls. This system makes it possible to use a flexible picture hanging system even with slanted walls, for example in a staircase.

MICRO GRIP

PROVEN TECHNOLOGY

REDUCED TO THE ESSENCE

NEW DESIGN

- LIGHTWEIGHT
- STRONG (20 kg)
- ERGONOMIC

The **Micro Grip** represents the newest generation of hooks. A high-quality plastic reinforced with fibreglass was chosen for this hook, leading to a 70% reduction in the use of materials compared with previous generations of hooks. In addition to the ecological advantages, the hook is extremely lightweight as a result, and very easy to use. The **Micro Grip** technology has been developed and patented by Artiteq. To guarantee the quality of the Micro Grip hooks, Artiteq has developed quality assurance procedures together with TÜV Nederland. The execution is under supervision of TÜV Nederland.
